

# Design and Implementation of Mobile Applications

*Exercise Lectures*

POLITECNICO DI MILANO

# Me

## Giovanni Quattrocchi

[giovanni.quattrocchi@polimi.it](mailto:giovanni.quattrocchi@polimi.it)

Ph.D., currently post-doc @ DEEPSE lab

Research interests: *self-adaptive systems, cloud and edge computing, big-data frameworks\**

*\*Thesis available*

# Exercise Lectures

- Live coding
- Build a “complete” app from scratch
- 4 technologies
- Cross-platform vs Native development

# What You Will Learn

- Flutter, React Native, Android and iOS SDK
- Different programming languages
- React and Flutter share a lot of concepts
- Also Android and iOS
- Design principles remain the same

# The Code

<https://github.com/gioenn/dima>

*All the code written in the lectures will be uploaded to the course repository on GitHub.*
